

Professional Label Printing for QuickBooks

Design, customize, and print exactly the labels your business needs — from your existing QuickBooks data.

QuickBooks Enterprise includes basic label printing capability — but it falls significantly short for businesses that need real flexibility. **Label Connector by Accuware** is a dedicated label printing integration that unlocks the full power of your QuickBooks data for professional label production.

QuickBooks Built-in vs. Label Connector

OUT OF THE BOX

QuickBooks Desktop

- Print one item or all — no range or multi-select
- Very limited label data fields available
- Restricted to preset sizes — no 4x6 support
- No label designer whatsoever
- Minimal Avery sheet size options
- No access to custom item fields

RECOMMENDED SOLUTION

Label Connector by Accuware

- ✓ Full range & filter — print any item selection
- ✓ All QuickBooks fields including custom item fields
- ✓ Any label size — including standard 4x6
- ✓ Full drag-and-drop label designer built in
- ✓ Unlimited label templates — no restrictions
- ✓ Invoices, sales orders, POs & more supported

Everything You Need for Professional Labeling

Six core capabilities that set Label Connector apart from the competition.

Key Capabilities

Full Label Designer

Place text, barcodes, logos, and lines anywhere on your label. Use word wrapping, static text, and precise layout controls to build the exact label your business requires.

Rich QuickBooks Data Sources

Pull from all QuickBooks item fields, including custom fields. Supports item lists, invoices, sales orders, purchase orders, and more for maximum data flexibility.

Unlimited Label Templates

Create and save as many label templates as your operation needs. Switch between designs instantly — no limits on templates, no extra cost, no restrictions.

Flexible Print Control

Select specific items, set print quantities, and use prompted fields for last-minute values like serial numbers, bin labels, or lot numbers known only at print time.

Comprehensive Item Search

Search and filter your item list using the same familiar methods as QuickBooks' own item list screen — fast, familiar, and efficient for high-volume label runs.

Multi-Printer Support

Connect to Zebra, Dymo, Brother, and virtually any other label printer. Roll-label printers are fully supported for high-volume daily label production environments.

How It Works — Four Simple Steps

01

Design Your Label

Use the built-in designer to create your label layout. Add data fields, barcodes, logos, and static text exactly where you want them.

02

Sync Your Items

Synchronize your QuickBooks item list into Label Connector to make all your product data available and ready for printing.

03

Select & Configure

Choose the items you need, pick your template, set quantities, and enter any prompted values for last-minute label details.

04

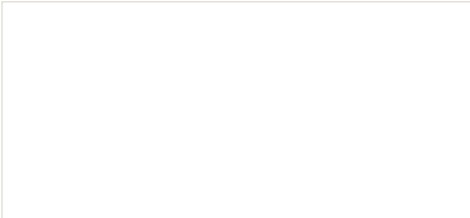

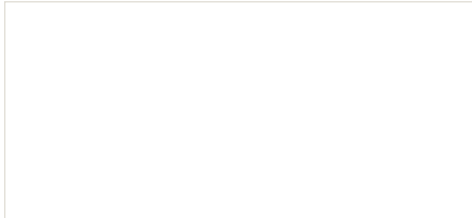

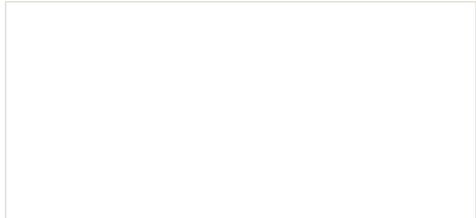

Print

Send to any connected printer. Roll-label printers like Zebra are fully supported for high-volume daily label production.

Labels for Every Industry and Use Case

From automotive AIAG labels to jewelry tags — Label Connector handles any label your business requires.

Real-World Label Examples

		
AIAG Labels Automotive industry standard labels from QuickBooks invoice data.	Jewelry Labels & Tags Butterfly labels, hang tags, and small wrap-around labels.	Order Labels Label inbound and outbound materials directly from orders.
		
Horticulture Tags Waterproof poly tags and plant stakes for nurseries.	Shipping Labels 4x6 labels with customer address from invoice or sales order.	Product Labels Item name, description, and barcode from QuickBooks data.

Works With Your Existing Printers

Label Connector works with **Zebra, Dymo, Brother**, and virtually any other label printer you already own. Roll-label printers are strongly recommended for businesses printing labels daily. We also offer a bundled printer option with free installation assistance — see our shop for details.

Ready to take control of your label printing?

Label Connector by Accuware integrates directly with QuickBooks Enterprise — installation included.
